- Exceptional analytics and research skills developed through academic experience
- Trained to use a variety of critical thinking skills to anticipate and to solve problems
- Strong written and verbal communication skills, ability to explain technical information to both technical and non-technical users
- Fully bilingual in both French and English

TECHNICAL SKILLS

Languages:	JavaScript, Java, HTML/CSS, C#, SQL, Python, .NET
Operating Systems:	MS Windows, Linux/Unix
Applications:	Visual Studio, Eclipse, IntelliJ, RStudio, Power Bi

EDUCATION

Software Engineering Technology Co-op Advanced Diploma
Centennial College, Toronto, ON

Jan. 2021 - Present
GPA: 4.08/4.5

Related Courses:

Programming I, II	Web Application Development
Web Interface Design	Advanced Database Concepts
Client-Side Web Development	Java Programming
Unix/Linux Operating Systems	Introduction to Analytics Programming

Academic Projects:

- Designed an interactive swimming tracking program with Windows Forms(.NET) and C#. The program displays a list of swimmers and a list of swimming clubs which can be modified by the user. Upon being prompt and filling out a swimmer's or a club's attributes, the user will be able to add a new swimmer or a new club to the list. The program also allows users to upload swimmers or clubs from a text file into the displayed list and vice versa.
- Created a web registration application using C# and JavaScript. The application prompts the user for their information. In the corresponding textboxes are placeholders that help the user enter information in the correct format. If the ideal format is not respected, a message will pop up next to the respective textbox to tell the user to use the correct formatting. Only when all the information is filled correctly will the information be saved following a pop-up message displayed at the top of the page.

Bachelor of Social Science - Economics and Public Policy
University of Ottawa, ON

Apr. 2018
